

Cold Junction Probe

COLD JUNCTION PROBE

GENERAL

Cold Junction Probe is highly accurate duplex Probe available for different kinds of thermocouple like (K,J,N,R,S,T) with 8/6 mm copper tube and length 400mm. This Cold junction probe is the best deal for all the calibration laboratory and test houses.

FEATURES

- ✓High accuracy and stabilization
- ✓ Cost Effective solution
- ✓Manufactured and tested under strict quality control standards

SPECIFICATIONS

- Insert Dia** : 8/6 Mm
- Type** : T/C (K,J,N,R,S,T) Duplex
- Sheath** : Copper Tube
- Length** : 400 MM
- End Connection** : Flying leads/ M/F Connector
- Cable Length** : 1000 mm
